1.3.1

Does your university as a body have targets to admit students who fall into the bottom 20% of household income group (or a more tightly defined target) in the country?

In 2025, UPTM recorded a total intake of 3,624 students. Students from B40 households formed the largest group, comprising 2,115 students (58.4%), followed by 901 M40 students (24.9%) and 363 T20 students (10.0%). The remaining 245 students (6.8%) were categorised as No Data (Unknown Data) because their household income classification was unavailable.

The predominance of B40 students highlights the importance of financial assistance and affordable student services in supporting access to higher education and student retention. Completing the unknown income data would further strengthen student profiling and support planning.

Department of Statistics Malaysia (DOSM), Malaysian households are commonly classified into three income groups based on monthly gross household income. The national thresholds in the Household Income Survey 2024. All Malaysians are categorized into three different income groups:

1. Top 20% (T20) ≈ RM12,680 and above
2. Middle 40% (M40) ≈ RM5,860–RM12,679
3. Bottom 40% (B40) ≈ Below RM5,860
